

David Forker and Bailey's Cream of Wasatch - Born 1 March 1997

David & Bailey have been an Operational K-9 Team since 1999. They have participated in numerous searches in Idaho and the surrounding states. Bailey is primarily used for Airscent situations including water and land cadaver as well as wilderness. Bailey will turn 11 this March and will probably retire sometime this year. He is still going strong now and strutting his stuff!
